Subject: Buffalo Creek road

Talked to Mark today. He thought this had all been resolved several times especially by Mark Hughes and the previous county attorney. His thought is that the city did annex in the park; however, just as the state maintains the state highways through the towns, so should the county. It is not a big deal to him, so I think we should just let Rick know that he can plow and maintain it, and we will continue to work on Easements. If we want something more formal, I think we should have our county attorney look into what was decided previously and draw up a MOU to present the city.
