Hello,

The monitoring of the wells will be done for 30 years period. The cost was the last engineering cost from Trihydro. The cost when we do it in house is approx. \$180.00 per testing. And we do it every 6 months. Engineering cost will be done through the granting process under the Cease and Transfer program.

I have had correspondence with Craig McOmie in regards to the process.

Thanks

Cynthia Crabtree

Hi, all,

I don't have Bill Lambert's email address so could not include him on this email. Cheryl, would you see that this is copied to him as well? I appreciate the information from CWCSWDD. We have recorded a liability of the \$890,120, currently based on the documentation we received from CWCSWDD and the DEQ. That still does not allow us to remove the qualification on our report since DEQ has said their number is an estimate and you would need to get an assessment from an engineer of the actual costs to close. If you send us documentation of the engineer's monitoring costs and the number of years that

the monitoring needs to be performed, then we can definitely add the \$1-1.7 million for the monitoring costs. However, we will still would have a qualification related to the closure costs.

Please send that documentation showing the \$54,950.71 and the number of years that this post-closure monitoring will need to continue and we will be happy to book that additional liability before we release.

Thanks,
Vikki

Subject: numbers

Cheryl,

Here are the numbers that the auditor didn't have for the meeting. Just ask and I will get what we have for the Central Weston County Solid Waste Disposal District.

Closure according to the DEQ will be approximately \$750,000.00

Monitoring done by Tri-hydro from Laramie is approximately \$54,950.71 per year (\$4579.23 a month)

Bank Balance as of February 28, 2015 is \$76,851.53

Thanks

Cynthia Crabtree
