**Subject:** Fwd: heating and cooling

Here is some correspondence I had with Jerry, I will put this on the agenda. I would think we should get started.

Thanks Bill

Bill:

I have not done anything else at this point. I believe if you want to go ahead the commissioners will have to agree to proceed with the advertising of the bid package. It is a design/build package with the selected firm doing the appraisal of the existing system with recommendations and designs for the preferred method. It is a two part process where the actual construction could be held up based on what your Architect says.

Jerry, sorry for not getting in contact quicker. Are you going forward with the design of the heating and cooling in the court house like we discussed the other day? Either way is there something we should report on Tuesday? I did not see you on the agenda which is alright just call me or email if there is something to report to the commission. I will be on my cell phone today, 746-5942 or Marcia's # 746-5816

Thanks Bill
