William, The Fiddler Creek Rd is an extension going west from the Oil City Highway, highway 451. I assume the reason there were some wider easements was at some point someone envisioned that road connecting highway 16 with highway 116 south of Upton. It still does not explain why there are different widths for those easements. I would think the commission should decide if we need to maintain the wider widths or go back to a normal 60 foot easement especially if there are easements that we need to get.
